11 AN IMPORTANT ECONOMIC AND SOCIAL ROLE
ORPEA was set up in 1989 by Dr Jean-Claude Marian and its facilities cater for people who have lost a degree of independence, either physical or mental. The aim is to provide the care needed for their wellbeing and support them with day-to-day tasks, while respecting their dignity and individuality.

OUR BUSINESS

The Group has a comprehensive, complementary range of care services, provided on a medium- and longterm basis, regardless of age or type of dependency loss:

- long-term care facilities and medical nursing homes,
- post-acute and rehabilitation care facilities for people requiring medical monitoring and rehabilitation care following surgery or an acute episode of a chronic illness,
- psychiatric clinics for people suffering from mental illnesses,
- home care services,
- independant living.

The ORPEA Group is committed to dedicating all the staff and technical resources necessary to ensure the wellbeing of its patients and residents, and to provide an exemplary level of care.
The Group’s development has always been guided by a single objective: to provide high-quality care at all stages of dependency.

METHODICAL CREATION OF A MARKET LEADER:

1989 Creation of ORPEA Group by Dr. Marian M.D. From 1989 to 1995, the Group expands in France, mainly through the creation of 46 facilities, representing 4,600 nursing home beds.

1999 Development of a medium-term care offering: ORPEA focuses on the creation and acquisition of post-acute rehabilitation hospitals and psychiatric hospitals, through a new dedicated subsidiary: CLINEA

2002 IPO: This step enables ORPEA to establish its reputation in France and Europe, and provide leverage for ORPEA to accelerate expansion.

2004 Expansion into Europe: Thanks to its track-record, ORPEA begins to expand into Europe, in countries facing the challenge of ageing population, with a fragmented and insufficient offer in the nursing home sector. ORPEA opens its 2 first facilities in Italy.

2006 First acquisitions in Switzerland, Belgium and Spain: a psychiatric hospital in Nyon (by Lake Geneva), a geriatric complex in the center of Brussels and the Spanish Group CARE with 15 facilities representing 1,504 beds.

2008 Structuring of ORPEA’s presence in Europe: creation of head offices in Belgium, Spain and Italy, and rolling out its quality policy at all of its facilities in Europe.

2010 Strengthening of the French network with the acquisition of MEDITER (which notably owns a stake in Medibelge), representing a total of 4,866 beds in 57 facilities.

2012/15 Strong acceleration of international expansion, particularly in German-speaking countries, with major strategic acquisitions in Switzerland, Germany, Austria and Czech Republic.

2016 Acquisition of MEDI-system (704 beds) in Poland and Sanyres in Spain (3,300 beds).

Acquisition of Anavita (932 beds) in Czech Republic and Dr. Dr. Wagner Group (1,812 beds) in Austria.

Expansion into Portugal (1,000 beds under construction*) and Brazil (2,000 beds under construction*)

**A SINGLE EUROPEAN NETWORK: 86,650 BEDS ACROSS 818 SITES (december 2017)**

**1989** Creation of ORPEA Group by Dr. Marian M.D. From 1989 to 1995, the Group expands in France, mainly through the creation of 46 facilities, representing 4,600 nursing home beds.

**2016** Acquisition of MEDI-system (704 beds) in Poland and Sanyres in Spain (3,300 beds).
Across France, the Group offers a comprehensive range of accommodation, services and care for dependent people:

- medical nursing homes under the ORPEA brand,
- post-acute and rehabilitation care facilities and psychiatric clinics under the CLINEA brand,
- home-based services via DOMIDOM and ADHAP Services agencies,
- independant living.

France represents 39% of ORPEA network with 33,437 authorized beds on 357 facilities.

In France, the ORPEA Group’s long-term care facilities offer various accommodation solutions to meet various family requirements:
- long-term accommodation,
- temporary or respite accommodation,
- day care.

Many ORPEA facilities also have protected units specialising in caring for people suffering from Alzheimer’s disease and similar illnesses, along with major dependency units, dedicated to very fragile people or people at the end of their lives. Specific care plans are developed to provide appropriate support to patients.

CLINEA has gradually developed a diversified range of care, including full hospitalisation or day care:

- A Post-acute and rehabilitation care
  - Versatile post-acute care, specialising in geriatrics, haematology and oncology,
  - Physical therapy: people with illnesses affecting the motor system and the nervous system or in a chronic vegetative state,
  - Cardiovascular rehabilitation.
  - Breathing rehabilitation.

- A Psychiatric care
  - Mood disorders (depression, bipolar disorder),
  - Anxiety disorders (compulsive obsessive disorder, panic attacks, anxiety, social phobia),
  - Addictions,
  - Eating disorders,
  - Disorders among children and young people (adolescents and young adults aged 15-25) within specialised units.

ORPEA also provides home care for people with diminished autonomy, mainly in France via DOMIDOM ans ADHAP services agencies (but also in Austria and Germany). The aim is to achieve better continuity of care between the patient’s home and the post-acute and rehabilitation facilities and nursing homes.

The various services include:
- Personal comfort services: cleaning, ironing, gardening;
- Dependency services: moral support, daytime or night-time supervision, personal hygiene assistance, meal assistance;
- Support services: help in walking or in car travel.
Since 2004, ORPEA has actively continued its international expansion with 53,213 beds outside France (61% of the overall network) and offers a range of care solutions that is tailored to the characteristics and needs of each country in which it operates.

**GERMANY**
165 facilities | 17,572 beds
ORPEA offers a comprehensive range of accommodation, services and care for dependent people in Germany, after the acquisition of groups that have developed a specialised and highly reputed offering:

- Silver Care group acquired in 2014 (which is the quality leader), and Residenz Gruppe Bremen and Vitalis acquired in 2015, two complementary regional networks of modern nursing homes in attractive regions (Lower Saxony, North Rhine-Westphalia etc.),
- Celenus Kliniken acquired in 2015, Germany’s third-ranked private operator, specialised in post-acute care, rehabilitation and psychiatric (psychosomatic care) facilities.

**AUSTRIA**
81 facilities | 7,042 beds
In January 2015, ORPEA acquired SeneCura Group, Austria’s leading provider of long-term care in the private sector with an integrated service offering assisted-living and care options for the elderly, comprising nursing, rehabilitation clinics, in-home care and services. In 2017, ORPEA has bolstered its leadership in the Austrian private nursing home sector, with the acquisition of the Dr Dr Wagner Group (18 facilities representing 1,812 beds).

**BELGIUM**
60 facilities | 7,443 beds
Over the years, ORPEA Belgium has become one of Belgium’s leading networks of facilities specialising in caring for the elderly, and the leading network in Brussels, with its independent living, rest homes for independent elderly people, and care homes for dependent elderly people.

**SWITZERLAND**
34 facilities | 3,340 beds
ORPEA has operated for a long time in the Canton of Vaud, with two clinics near Geneva (general psychiatric care and post-acute care). In March 2014, the Group acquired Swiss group Senevita, expanding its activity into German-speaking Switzerland with a network of assisted living and nursing homes.

**ITALY**
15 facilities | 1,736 beds
The Group has developed and built the ORPEA Italia network, mainly in the north of the country. All of its facilities feature a very high level of medical care (medical nursing homes, physical therapy and psychiatric clinics).

**CZECH REPUBLIC**
17 facilities | 2,463 beds
ORPEA has been in Czech Republic since 2015, with the acquisition of SeneCura Group, which had 3 facilities under construction in this country (325 beds). ORPEA is now the number one private nursing home operator in the Czech Republic, following the acquisition of Anavita in 2017, one of the leading operators of nursing homes in the Czech Republic, with a network of 6 facilities and 932 beds.

**SPAIN**
47 facilities | 8,071 beds
The ORPEA Iberica network is made up of medical nursing homes across Spain, with strategic locations in major cities including Madrid (55% of ORPEA Iberica facilities), Seville and Valencia.
In January 2016, ORPEA bought MEDI-System, Poland’s No. 1 private dependency care operator, with a unique network of modern care facilities, mostly located in the Warsaw region. MEDI-System’s offer covers a variety of areas of dependency care, including nursing homes and post-acute care and rehabilitation clinics.

More than 1,000 beds are currently under construction in Portugal, in strategic locations such as Lisbon, Cascais and Porto. For the expansion into this country, with the oldest population of Europe, ORPEA has decided to partner with the SIS Group, whose owner is a well-known entrepreneur and a pioneer in Europe’s private health since 40 years. ORPEA and SIS have set up a joint venture, in which ORPEA owns 49% of the capital.

More than 2,000 beds are already under construction in Brazil (in prime locations, including Sao Paulo, Rio de Janeiro, Belo Horizonte and Fortaleza), where the supply is limited: approximately 3 beds per 100 people over 80, compared with 20 in Europe. For this development, ORPEA is also partnering with the SIS Group, with a joint venture 49% owned by ORPEA.

The ORPEA pilot facility in China opened its doors in 2016, in Nanjing. In 2018, operational joint-ventures have been created with HNA Group and Taikang Insurance Group to continue the development in China through partnership.

The aims of ORPEA’s facilities:

- To provide our residents and patients with living care environments that are friendly and suited to their needs
- To ensure their comfort and safety
- To promote their fulfilment and wellbeing throughout their stay, through appropriate socio-cultural and therapeutic activities
- To support their long-term reintegration and rehabilitation
Staff recruitment is based on technical expertise as well as human qualities.

STAFF INVOLVED IN THE CARE OF RESIDENTS AND PATIENTS
As well as their professional qualifications, ORPEA group staff share values that are vital for providing high-quality care:

- **Kindness plays a central role** in the good treatment of residents and patients, and guides staff in their day-to-day activities. It consists of a willingness to listen, availability, respect and trust.
- **Hospitality, friendliness and good humour** turn facilities into genuine living spaces where residents and patients can interact, that are open to the outside and conducive to the development of social ties, which are vital for remaining independent.

ONGOING RECRUITMENT
With more than 3,000 people hired every year in France, ORPEA has a dynamic recruitment policy. The vast majority of vacancies are for permanent jobs in the fields of medicine, care, residential services/catering and administration.

ORPEA places great importance on human qualities, and on diversity within its teams. In this respect, the Group promotes alliances between the generations, fostering the integration of young people into the workplace while keeping older employees in work so that they can pass on their skills.

ORPEA is also committed to integrating disabled people into the workforce and ensuring their ongoing employment.

WHY JOIN ORPEA?
- Thriving and developing potentials in an environment which promotes the well-being,
- Being enhanced by structured and harmonised working procedures,
- Benefiting from an ambitious training policy and professional development opportunities, in order to develop your career,
- Working in collaborative mode, in a Group which promotes the teamwork and the knowledge sharing,
- Sharing strong collective experiences and participating in innovative care plans.

CHARTER OF “TEAM COMMITMENTS”
Each facility draws up a charter of “team commitments”. Each team defines its own concept of the values that underpin our ethics and professional conduct, i.e. respect, hospitality, the willingness to listen, trust, professional conscience, good humour and mutual assistance.

SEND YOUR APPLICATION TO: drh-recrutement@orpea.net
In 2004, ORPEA stepped up its training policy by setting up in France a nursing auxiliary school called DOMEA, helping people to obtain recognised government qualifications. Training is provided by grass-roots professionals, and takes the form of initial classroom sessions and on-the-job learning.

Every year, DOMEA also helps ORPEA Group staff obtain “validation of prior experience” diplomas, and as a result obtain nursing auxiliary qualifications.

So that our managers can anticipate changes in our environment, but also to support their professional development, ORPEA has set up a custom training programme with ESCP Europe.

This programme, which includes theoretical and practical teaching modules, has been tailored to the Group’s specific needs, so that staff can explore, propose and put into practice their learnings and their analysis of the issues that they encounter in their day-to-day work.

This training is also an opportunity to promote discussions about strategic cross-discipline projects, in order to support the group’s development in the next few years. At the end of their training, ORPEA staff can obtain a specialist masters in medical and hospital management from ESCP Europe.

Showing the quality of the work done by ORPEA Group teams, some French clinics are authorised to take in and train medical interns, just like a university hospital.
Since its creation, the ORPEA Group’s development has been based on a proactive culture of quality, which is expressed through its ongoing efforts to optimise and improve the services it provides to residents and patients.

**A CENTRALISED ORGANISATION**

With the support of a well organised administrative head office, which houses all general departments and support functions, facility managers have all the expertise they need to ensure the smooth running of their facility.

This enables them to concentrate all their efforts and skills on serving residents and patients.

Care, residential services and admin teams are always available to listen to residents and patients. They are committed to addressing the requests made to them with dedication and respect.

**RIGOROUS CARE MONITORING**

Support and care are provided by qualified professionals who receive year-round training.

The quality of care is ensured through the application of procedures and protocols defined by the Group’s Medical Department.

All actions are traced to ensure that residents and patients receive the best care, and to promote the sharing of information between teams.

**THE ORPEA CHARTER OF COMMITMENTS**

Every day, 55,000 staff apply their expertise and professional conscience to ensuring the wellbeing of residents and patients, treating them with respect and listening to all their concerns.

ORPEA’s charter brings together the Group’s commitments in terms of hospitality, comfort, care, catering, activities and information, so that staff can meet their needs in the best way possible.

The monitoring work done on Group facilities by the Quality Unit and the Medical Department means that residents and patients can feel secure in their environment, and covers all aspects of accommodation, comfort, care and safety.
Quality is also a state of mind. All of our teams promote this high quality of service and care and are committed to improving it on an ongoing basis.

OUR APPROACH

It must be acknowledged that the care provided to residents and patients cannot be perfect 24/7, and each individual also has their own standards and expectations. It is only through constant effort and the permanent dedication of our staff that we can achieve consistent quality every day.

All Group staff strive constantly to find any way of improving the service provided to residents and patients.

IN-HOUSE TRAINING

Awareness-raising initiatives are organised throughout the year regarding best practice in areas such as Alzheimer’s disease, prevention of mistreatment, postures and movements, and safety.

These in-house training modules provide an opportunity to update and enhance staff knowledge, but also to share day-to-day experiences.

REGULAR ASSESSMENTS

Internal appraisals are carried out by regional departments, the Quality Unit, the Medical Department and/or the Group’s senior management. They are an opportunity to check that procedures are being understood and applied, and that staff are fully aware of the protocols to be used. They also ensure that remedial action is taken in a timely fashion.

External appraisals and certification efforts provide transparency for both residents and their loved ones, and ensure that our facilities meet clear commitments regarding the consistency of service quality.

SATISFACTION SURVEYS

To ensure that the services and care provided by the Group meet the expectations of users, anonymous satisfaction surveys are carried out:

- among patients when they leave hospital,
- among residents and their loved ones each year,
- among prescribing physicians and other correspondents.

IN 2017, 93.9% OF RESIDENTS AND FAMILIES (1) WOULD RECOMMEND AN ORPEA FACILITY TO SOMEONE CLOSE TO THEM BASED ON THE QUALITY OF LIFE AND CARE PROVIDED.

1 Satisfaction survey carried out in the fourth quarter of 2017 in Europe: questionnaires were given to more than 47,881 residents and families at ORPEA facilities, and 59.1% of them responses were received.
As well as ensuring that facilities operate correctly and meeting safety requirements, we design our facilities as living environments, with comfort and aesthetic qualities also playing a part in the wellbeing of residents and patients.

THE MOST MODERN EQUIPMENT

Each ORPEA facility has a variety of modern equipment suited to the medical specialities and illnesses it treats.

For example, some facilities have:

- a physiotherapy centre or gym,
- an outside activity or walking trail,
- an occupational therapy and/or psychomotility workshop,
- a kitchen or therapeutic apartment,
- a swimming and rehabilitation pool, or a diagnosis and rehabilitation platform for people with balance and walking disorders, and an isokinetic physical therapy unit,
- a fitness testing room, an ultrasound room and a respiratory physiotherapy room for the rehabilitation of people with cardiovascular problems.

In addition, some of our facilities also have a Snoezelen multi-sensory stimulation room, a therapeutic and relaxing bathing area and a hairdressing and beauty salon. These are all areas in which residents and patients can unwind and enjoy themselves.

HIGH-QUALITY INFRASTRUCTURE

All Group facilities are fully equipped to ensure the comfort and safety of dependent, fragile people.

User-friendly design avoids risks and promotes wellbeing. Our facilities are designed to preserve each user’s privacy, while promoting the development of social ties, through:

- comfortably furnished bedrooms for individuals and couples, providing them with private space;
- friendly, convivial living areas (living rooms, libraries, patios etc.) where various therapeutic activities and workshops are organised to enhance the fulfilment of residents and patients, but also where they can meet each other as well as friends and family visiting from outside;
- dining rooms featuring table service, where residents and patients can enjoy high-quality meals cooked on-site by our chefs.

A RESPONSIBLE APPROACH TO SAFETY

Safety is obviously one of our main ongoing concerns. We apply strict procedures to minimise risks and all our staff receive training every year.

The Group’s facilities are supported by the Works and Maintenance Department, which ensures that equipment is properly maintained. All equipment is also checked by approved external companies.

For new facilities, ORPEA has also developed a quality process to ensure that it builds facilities that meet the most demanding regulatory standards and offer some of the highest levels of comfort in the sector.
ORPEA is a committed, responsible company that aims to lead the way and innovate in its area of activity. It wants to be pro-active in anticipating changes in care methods, in order to meet the challenges of tomorrow.

RESEARCH

The Medical Department co-ordinates studies with care teams to measure the benefits of new equipment, such as the use of balneotherapy to treat chronic pain in elderly people, and non-medical therapies.

Research is also carried out with experts in specific areas such as nutrition in Alzheimer’s patients. An example is the study carried out with the Institut Paul Bocuse and AgroParisTech on making food more enjoyable by offering specific menus suited to patients’ needs, preferences and pace of life.

Through this research, our teams seek to ensure that their efforts genuinely promote the enjoyment and wellbeing of residents and patients, regardless of age and illness.

ORPEA GROUP’S PANEL OF PSYCHOLOGISTS:
A FORUM FOR DISCUSSION AND INTERACTION

In 2004, ORPEA set up its Panel of Psychologists, which now has over 200 professionals working within the Group’s facilities. The Panel’s aim is to help improve and enrich the psychotherapeutic care provided to residents and patients:

- by taking a cross-discipline view across the three clinical fields to harmonise knowledge and care approaches;
- by designing, validating, evaluating and perfecting various care tools.

The Panel of Psychologists now has a bi-annual review that publishes a summary of its work — published by Editions Erès, a leading publisher in the fields of psychology and psychoanalysis — and is reviewed by a scientific committee consisting of eminent experts and professors well known in the profession.

To support discussions about external theoretical and clinical contributions, the Panel is also strengthening its links with a network of well-known professionals, and is developing dialogue between universities and care facilities through various academic partnerships, such as the one with the École des Psychologues Praticiens. A symposium is also organised every year, which brings together over 400 professionals, the majority of whom are outside of ORPEA Group.
Through its ongoing efforts to monitor innovative systems and new care approaches, ORPEA aims to be able to provide solutions that meet the needs of residents and patients, but also the expectations of its staff, ever more closely.

**MONITORING**

At all levels of the Group and in all areas (IT, medicines and pharmaceuticals, purchasing, catering etc.), ORPEA Group staff are permanently looking for ways to support residents and patients in the best way possible, while ensuring high-quality working conditions for teams.

Ongoing discussions are also held with the Group’s architects and suppliers to design and layout pleasant and genuinely suitable spaces, and to come up with new solutions that take into account likely developments in care needs and medical progress. The architecture and layout of our facilities play an active role in the quality of care.

ORPEA staff also take advantage of various opportunities to share experiences and best practice with healthcare professionals (in private practice, working in hospitals or clinics), through regional conferences. These events allow participants to share information, in order to offer consistent, comprehensive and suitable solutions for patients and their families.

**EXPERIMENTAL RESEARCH**

ORPEA takes part in experimental research led by supervisory authorities. It has also won a tender to set up a telemedicine system in long-term care facilities, aimed at meeting urgent care needs, particularly at night and at weekends. For ORPEA, the aim is clear: to enhance the safety of care by obtaining a remote medical opinion, and to avoid residents having to travel any more than necessary (e.g. to an external consultation or a hospital visit).

ORPEA’s staff frequently take part in professional competitions and awards, which are an opportunity to discuss and promote their practices. ORPEA has won awards in the Silver Eco Show in each of the last three years.

**A GROUP ADDRESSING TODAY’S KEY CONCERNS**

**CARE FOR ALZHEIMER’S PATIENTS**

- Care facilities whose architecture is specifically designed by the Medical Department to allow people with behavioural disorders to live with other people, with no constraints and in full safety, in a specially tailored environment.
- Active monitoring to identify new equipment to support these people.
- Discussions regarding non-medical therapies (reminiscence, multisensory stimulation workshops, occupational therapy, suitable physical activity etc.) in order to mitigate disorders and keep residents independent for as long as possible, while promoting their wellbeing.
- Specific staff training.
- Therapeutic education programmes for carers.

**AN INTERNATIONAL SCIENTIFIC AND ETHICS COUNCIL**

As part of its drive to further develop a culture of professionalism and responsibility shared by all employees of the Group in the areas of ethics, research and care innovation. ORPEA has created a Scientific and Ethics Council, consisting of professors of medicine with European reputations drawn from outside the group.

This Scientific and Ethics Council contributes to cultural cohesion by providing information, experience and skills in medical quality and safety, health and wellbeing, science and techniques.

The Council is charged with responding to questions of medical ethics submitted to it by Group establishments, as well as the analysis and evaluation of opportunities for research and innovation and ensuring the consistency of training and educational structures and initiatives within the group.
ORPEA is a committed participant in its regional economies, creating over 1,000 jobs per year and supporting local charities.

SOCIAL INTEGRATION

ORPEA wants its facilities to become places for people to meet and interact, as an integral part of their communities. Families and loved ones are therefore invited to take part in events held at facilities. The Group also promotes interaction between generations by involving children living in the local area or attending neighbouring schools. The Group is committed to playing a socially responsible role in its regions, supporting local charities and taking part in sporting events.

HEALTH EDUCATION

ORPEA’s teams also seek to promote a good quality of life among the largest possible number of older adults. During open days, they provide their expertise for the purposes of health education, thereby aiming to combat public health problems. Conferences and workshops are frequently held at our facilities, covering subjects as varied as getting a good night’s sleep, preventing falls, and learning about Alzheimer’s disease.

ENVIRONMENTAL PROTECTION

For ORPEA, it is vital that its facilities protect the local environment. Through its core business, the ORPEA Group is strongly committed to intergenerational transmission, and has adopted an environmentally responsible approach, with the aim of gradually reducing its facilities’ energy consumption and waste. To achieve this, it raises awareness regarding environmentally friendly behaviour and applies energy-saving methods. As the project owner in respect of its facilities, ORPEA supplements these awareness-raising efforts through a quality process covering construction work and the maintenance of its facilities, in order to limit their impact on the external environment, while ensuring healthy and comfortable living conditions for its residents and patients.

ENHANCING AMENITIES

The Group is helping to enhance regional amenities, with 12,371 beds in facilities under construction and refurbishment in Europe. Through its development plans, ORPEA plays a role in the construction of new districts and enhances the amenities of districts being redeveloped.
